EDUCATION

2024 - 2027	B.Tech (Computer Science and Engineering) Dr. A. P. J. Abdul Kalam Technical University, Lucknow	Expected Graduation: 2027
2021 - 2024	Diploma(Computer Science and Engineering) Government Polytechnic Mohammadi Kheri	65.6%
2021	Class 12th UP BOARD	69.6%

TRAINING

Techpile Technology Pvt Ltd – Mern Stack Developer Intern July 2023 – September 2023

- Completed hands-on training and development in the **MERN Stack (MongoDB, Express.js, React.js, Node.js)**, covering concepts from fundamentals to advanced full-stack application development.
- Built multiple full-stack modules including **authentication, CRUD operations, REST APIs, and state management**, improving understanding of scalable web application architecture.
- Developed responsive UI components in **React.js** using hooks, props-drilling solutions, and component-based architecture.
- Implemented backend services in **Node.js & Express.js**, connecting them with **MongoDB** for real-time data storage and secure API operations.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript
Frontend: React.js, Tailwind CSS
Backend: Node.js, Express.js
Database: MongoDB, mongoose
Tools: Git, GitHub, VS Code, Postman
Concepts: REST APIs, JWT Authentication, CRUD Operations, AI Integration

PROJECTS

CareerPilot AI — Full-Stack GenAI Interview Preparation Platform Live Demo

- Built a production-ready AI-powered job preparation platform using React.js, Node.js, Express.js, MongoDB, JWT, and Gemini API, enabling users to upload resumes and prepare for technical interviews.
- Implemented secure JWT authentication, token blacklisting, resume parsing, AI-powered skill gap detection, and ATS-optimized resume generation with Puppeteer for dynamic PDF creation.
- Developed intelligent interview preparation features, including AI-generated interview questions, job description analysis, and personalized career insights through seamless Gemini AI integration.

AI Virtual Assistant — MERN + Google Gemini API Live Demo

- Built an AI-powered virtual assistant using **React.js, Node.js, Express, and Gemini API**, capable of answering queries, generating content, and performing conversational tasks.
- Implemented secure backend APIs to interact with **Google Gemini LLM**, enabling dynamic responses and real-time processing.
- Designed an intuitive frontend UI for voice/text interaction, incorporating state management and seamless API integration.

E-Commerce Website — Full-Stack MERN Application Live Demo

- Developed a complete e-commerce platform using **React.js, Node.js, Express.js, and MongoDB**, supporting product browsing, cart management, and checkout.
- Implemented backend APIs for **user authentication (JWT), CRUD operations, and order management** with secure data handling.
- Built responsive and interactive UI pages along with **Stripe Payment Gateway** integration for safe online transactions.
